Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, "the initial shift-register unit", in claim 9, "the subsequent stage shift-register unit", "the previous stage shift-register unit", "the odd stage shift-register units" and "the even stage shift-register units", in claim 11, "the first clock signal" and "the second clock signal", in claims 13 and 15, "the setting signal", in claim 19, "the subsequent stage shift-register unit", "the output signal" on both lines 19 and 24 and "the previous stage shift-register unit" and in claim 21, "the first clock signal", "the second clock signal" and "the third clock signal" lack a clear antecedent basis.

Allowable Subject Matter

Claims 2-8, 9-18 and 20-28 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claims 1, 9 and 19 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Conclusion

Art Unit: 2816

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hwang et al and Kubota et al are relevant to the present invention. Kubota et al, in particular, shows a shift register which is structurally very similar to the embodiments of claims 9 and 19; however, there is no teaching for outputting the clock signal as the pulse signal. Quite the contrary, Kubota specifically discloses that the start signal is output as the pulse signal. Furthermore, Kubota employs a different clocking scheme than what is recited in the claims, inter alia.
